Dear Dr. Little:

B.S.E. and Veterinary Medicines

Thank you very much indeed for your letter of the 26th of January outlining to me various steps that are proposing to take in order to reduce the risk from B.S.E. in veterinaray medicines. It is, as you say, an extremely difficult problem. I know my colleagues will be most interested in your reply which I will put before them at our next meeting.

Yours sincerely,

Sir Richard Southwood, F.R.S.
